# IDEAS AND TIPS

## Look for Evidence

- Burrowholes and droppings (likely near garbage).
- Holes or gnawmarks.

## Eliminate Food and Water Sources

- Secure garbage & compost (both indoor & outdoor) in plastic or metal receptacles with tight fitting lids.
- Never place fatty or oily food waste, eggs, or milk products in the composter.
- Remove pet food after feeding, clean waste from pet enclosures/yard.
- Eliminate watersources such as leaky faucets, bird baths, and all standing water.
- Keep areas around bird feeders and birdbaths clean.
- Remove bird feeders during a rodent infestation.
- Keep your yard free from all refuse.

## Eliminate Hiding and Living Places

- Cut all tall grass and weeds back from the home's foundation and throughout the property.
- Remove clutter from around the home, garage & shed.
- Lift wood piles approximately 30 cm (12 inches) off the ground and away from the home.

## Protect Buildings

- Repair cracks in the home's foundation
- Eliminate entry points (some rodents can squeeze through cracks as small as a dime).
- Use metal weather stripping under exterior doors.
- Cover drain pipes, dryer, fresh air, and attic vents with fine metal screening.
